Transforming the Customer Journey and Experience

For decades, technology companies have placed the primary responsibility of installing, managing, adopting, maintaining and ultimately extracting the maximum value of solutions on customers. Multivendor environments and legacy technologies have only added to this burden for cybersecurity customers leading to an urgent need to reduce complexity despite the constantly evolving threat landscape.

A company's investment in security technology is more than just a product purchase—it's about ensuring your company can fully realize the benefits of the technology in order to secure your organization. According to Accenture's 2021 report, *The State of Security Technology*, 81% of CISOs agree or strongly agree that the cybersecurity strategy is developed with business objectives, such as growth or market share, in mind.¹

As consumption models continue to evolve, it is becoming increasingly essential that vendors focus on customer success; not just product implementation. According to Deloitte's 2020 *Enterprise Customer Success Study and Outlook*, which surveyed 300 senior executives at organizations that consume technology solutions, customers view adoption (63%) and optimization (55%) services as critical to realizing desired outcomes.²

1. Lisa O'Connor, Marc Carrel-Billiard, Kelly Bissell and Ethan Hadar, *Security Technology Vision 2021*, Accenture, September 15, 2021, <https://www.accenture.com/us-en/insights/security/technology-trends-2021>.
2. *Enterprise customer success study and outlook: What do customers value?*, Deloitte, January 2020, <https://www2.deloitte.com/us/en/pages/consulting/articles/customer-success-management-survey.html>.

Helping Organizations Achieve the Best Security Outcomes

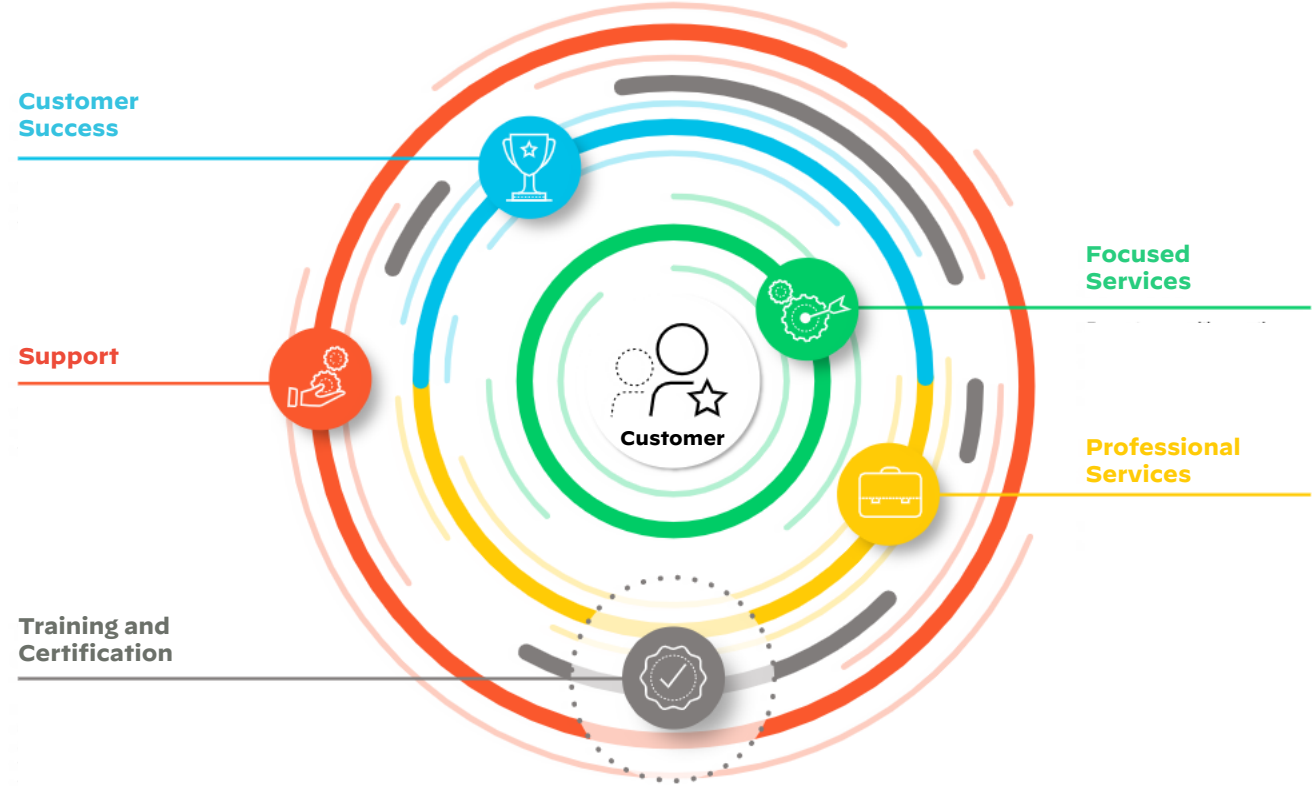

Palo Alto Networks is the only cybersecurity partner that frees digital enterprises from having to choose between the security they need today or being ready for what comes next. When you select Palo Alto Networks as your cybersecurity partner, our Global Customer Services (GCS) team is with you, delivering the guidance, expertise, and resources needed to maximize the value of your security investment.

At every stage of your cybersecurity journey—from implementing and driving adoption, to resolving technical roadblocks, to optimizing and innovating, Palo Alto Networks Global Customer Services is committed to helping you succeed.

With our expertise, services, support, and tools, we help you unlock the full power of the Palo Alto Networks platform through:

- Outcome-based offerings designed with your success in mind
- Digital-first tools and platforms provide right-sized support for your business priorities
- A global team of professionals with thorough knowledge and expertise in Palo Alto Networks and cybersecurity solutions, threat landscapes, and emerging risks

Global Customer Services Overview

Benefits of Palo Alto Networks Global Customer Services

With our expertise, offerings, and technology, Palo Alto Networks Global Customer Services help you conquer any security challenge.

Maximize Your Security Investment

- Align your architecture, implementation, and operations with industry best practices.
- Maximize uptime with exceptional support to ensure your business operates without disruption.
- Fully use all capabilities of our security solution with guidance from technical experts.

Strengthen Security Practices and Mitigate Risk

- Increase technology adoption with best practices to create a roadmap for continuous improvement.
- Enroll your staff in classes to optimize your configuration and keep you on the leading edge of security practices.
- Decrease downtime by benchmarking your security environment to identify opportunities to improve security effectiveness.

Transform Operations and Improve Efficiency

- Professional services and tools will streamline operations and enhance team efficiency.
- Learn how to strengthen your security and reduce manual tasks by attending in-depth training classes.
- Leverage integrations between products in your multivendor environment to improve security operations.

Palo Alto Networks Professional Services

Time constraints stifle implementation, adoption, and time to value of security solutions while inadequate knowledge and lack of resources limit the full scope of your cybersecurity operations, reducing ROI. For these reasons and more, Palo Alto Networks Professional Services delivers outcome-based engagements by doing the necessary work to help customers with design, migration, and implementation, ensuring accurate deployment and facilitating improved product consumption and usage.

Our cybersecurity professionals have thorough knowledge and expertise in cybersecurity solutions, threat landscapes, and emerging risks. We make significant investments in both our technology and our talent to ensure that we can fulfill our commitment to customers.

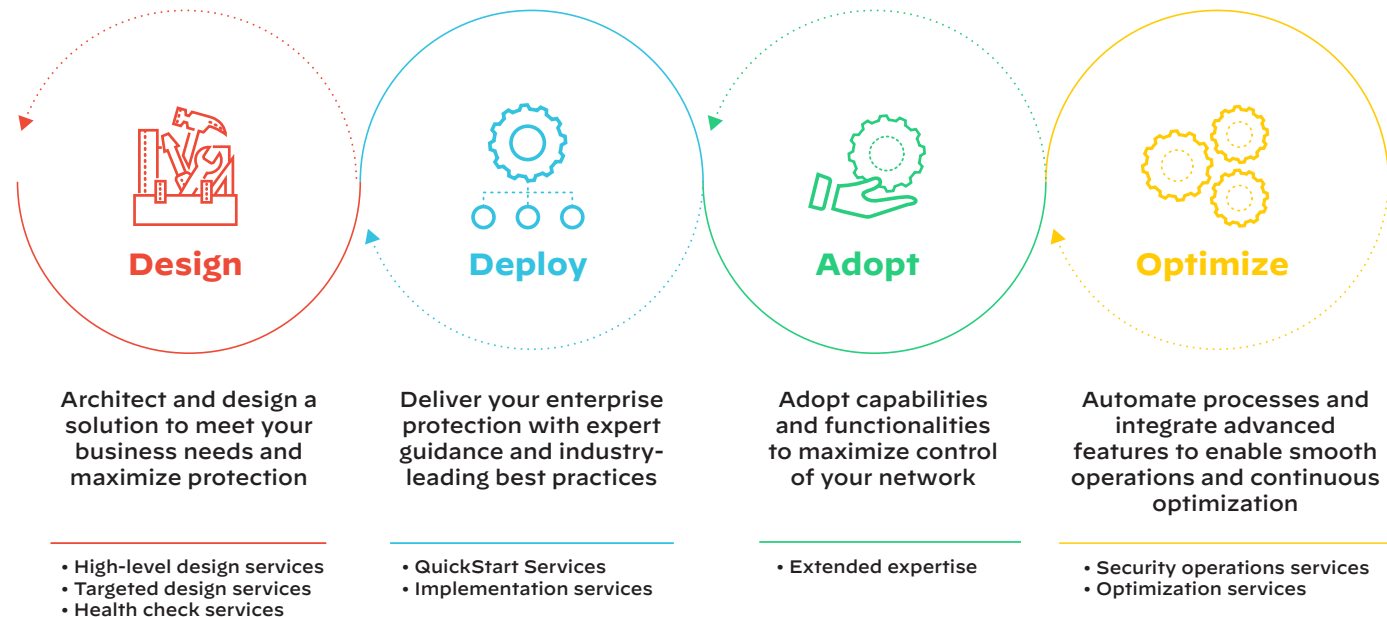

Key Benefits

- Accelerate implementation and capability adoption with expert guidance, configuration and operational confidence.
- Minimize risk through expert planning, proven methodologies, and quality execution by our consultants.
- Simplify operations and improve efficiency through best practices and automation.

Palo Alto Networks Professional Services Offerings

From architecture and design to deployment and optimization, our Professional Services teams utilize industry-leading best practices to operationalize and integrate Palo Alto Networks products into your multivendor IT environment to optimize your configuration and maintain cutting-edge security practices.

Palo Alto Networks Customer Success

According to a recent study by Deloitte, 50% of customers noted that the solutions, once implemented, did not completely deliver on the desired business outcomes.³

Palo Alto Networks Customer Success guides product journeys to help increase license and feature adoption to gain the maximum value from your investment.

Leverage the expertise of Customer Success teams to realize operational efficiency with your Palo Alto Networks product investment. These product experts guide customers through onboarding and update customers with best practices for our Prisma® Access, Prisma Cloud and Cortex® products. They also monitor product utilization, adoption and consumption to ensure optimal product performance and better enterprise security.

Key Benefits

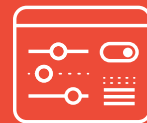

- **Maximized security posture:** Rely on industry-leading security experts with 24/7 telephone support to ensure your security is maximized.
- **Accelerated investment value:** Customer Success resources orchestrate and tailor your strategy, ensuring you get the most out of your investment.
- **Continuous assistance for success:** Guidance and oversight to help expedite your setup and initial configuration as you deploy across your organization.
